

### What kind of data shall I back-up?

We recommend that our customers execute back-ups of data on a regular basis and store the same on a PC, or hard disk, other than the PC of the test bench.

Follow these instructions to identify folders/files to back-up.

1) Software **ParSeq**, (end-of-line test benches):

*C:\Users\Public\Documents\Microplan\Parseq\ParseqFolders*

*C:\Users\Public\Documents\Microplan\Parseq\Scenarios*

2) Software **LabSoft 1.0**, (laboratory test benches and similar):

*C:\LabSoft*

3) Software **LabSoft 2.0**, (laboratory test benches and similar):

*C:\LabSoft* or *C:\LabSoft2*

4) Software **R&DFlex**, (R&D test benches and similar):

*C:\R&DFlex*

5) Software **Life Test**, (life tests):

*C:\LifeTest*

Please contact [Microplan Support](#) if your software is not included in the above list.
